

Dear Customer

Subject:
Letter of Presentation

Nova Systems Information & Communication Technology society was born on January 1981.

Nova Systems is an Italian company present in Italy, Mexico and Spain with more than 60 technical experts projected towards every emerging market. Nova Systems can count on technical offices and professionals to guarantee the functionality of all technological systems around the world in order to help our customers to expand.

Simplification and integration of company processes, applications and systems require professionalism and infrastructures supporting our customers' goals.

Nova Systems has more than 35 years of experience in technology for international forwarding, transports and logistics, realizing software and offering Cloud solutions.

Our customers find the global answer to their organization requests in the applications and services of one among the most sophisticated and advanced Cloud Computing.

The absolute warranty about the safety of the company data and the 24/7/365 service are just two examples indicating the quality level of Nova Systems service certificated by ISO 9001-9012 document.

Every year Nova Systems invests conspicuous resources in technology and innovation to guarantee to our customers an increasing competitiveness in the constantly evolving market.

Nova Systems
