

09-11-2017: The company receives an award for the BeOne in-Cloud solution

Nova System wins “Logistics company of the year”

The prize was awarded by Assologistica

We are proud to announce that, on Friday 20 October, in Milan, Nova Systems was awarded the prize “**Logistics Company of the Year**”, 2017 edition, thanks to the **BeOne in-Cloud solution**.

Prizes were awarded by **Assologistica, Assologistica Cultura e Formazione** and the monthly magazine **Euromerci** to companies that have implemented innovative projects during the year.

The prize was received by **Nova Systems’ CEO, Valerio Avesani**, who said: “I welcome this opportunity to thank all our employees and collaborators who, with their precious work and daily commitment, have enabled the company to win this prestigious prize for the international shipping, transport, customs and logistics sector.”

In giving the **reason for the award**, Assologistica described BeOne as “the in-Cloud solution of Nova Systems aimed at the world of international shipping, customs, transport and logistics. In Nova Systems’ software, the WMS is completely integrated with the other modules in the BeOne suite. The solution supports the activities of companies that have both B2C and B2B as their core business in the field of logistics and third party consignments.”

Among the solution’s various functions, the award citation continued, “there is BeOne Analytics: the data collection system analyses the phenomena, causes of problems and performance obtained to assess the progress of the company, the branches and the traffic. The suite also has integrated management control, accounting, customs operations, document management system, electronic

archiving (Document Management System), Data Interchange (EDI), Radiofrequency (RFID) and Code-on-Demand constraints management, Advances and Palettes. In addition, there is Customer Relationship Management (CRM): this enables the management to promote client loyalty, with the acquisition of new market shares, improve the interaction between the company's departments, boost productivity and aid commercial activity."
